

PSD / Edit Smart Objects

Replace the content of a Smart Object

Replace Smart Objects

You can easily replace the images with Smart Objects from the Layers panel, and do follow simple five steps:

1. Choose **Layer > Smart Objects > Edit Contents** OR Double-click the Smart Objects thumbnail in the Layers panel.
2. Navigate to the file you want to use, Click **File > Place** and select image from your computer.
3. The new content is placed in the Smart Object. Linked Smart Objects are also updated.
4. Click OK to close the dialog box.
5. Make edits to the source content file, and then choose **File > Save**.

Note: Photoshop updates the Smart Object to reflect the changes you made. (If you don't see the changes, make the Photoshop document containing the Smart Object active).

Replace Shapes Color:

The elements every single PSD is **100% scalable vector graphics** and you can free transform, distort, grow, reduce size and edit.

You can easily **change the color style** of text, shape and placeholders:

1. Double click on thumbnail of smart shape layer.
2. Set the Color from color dialogue box.
3. Click OK and Save.
